USDOI Bureau of Reclamation

USDOI Geological Survey

US Fish and Wildlife Service

Non-Governmental Organizations

The 2004 Arizona Drought Preparedness Plan established the Drought Interagency Coordinating Group (ICG) as an advisory body to the Governor. Comprised of state, federal and non governmental organizations, the Group provides a mechanism to coordinate and integrate drought planning and management on all lands within Arizona.

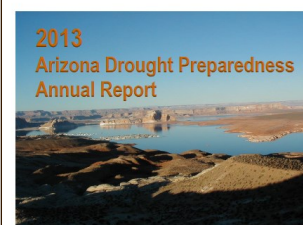

- Identifies pre-drought mitigation and adaptation options
- Advises the Governor of changes in drought conditions
- Requests a drought declaration (if conditions warrant) by June 1 based on water supply status, and by December 1 based on ancillary drought impacts
- Reviews and approves the Arizona Preparedness Annual Report for submittal to the Governor's office each year by November 20th
- Makes recommendations for improving monitoring, implementation, response and resources

For more information, visit the ADWR Drought Program website:
